Abstract (en)

[origin: WO2017044778A1] The present invention relates to a jacket/coat designed to provide an enhanced range of motion. This is accomplished by having a layered construction comprising different fabric/textile materials where the enhanced range of motion is desired. The jacket/coat in accordance with the present invention particularly provides an enhanced range of motion for a wearer around the shoulders and arms. This enhanced range of motion may be especially beneficial when the wearer is engaged in a physically demanding activity or any activity benefitting from a wide range of movement by the wearer's arms and shoulders.
