Abstract (en)

[origin: CA2994029A1] The present invention relates to a dispensing device (10) for unpacked goods, in particular bakery goods such as bread, rolls or the like, with at least one support frame (12) and with at least one drawer-like insert (14) inserted into the support frame (12) in the assembled state, wherein the drawer-like insert (14) delimits a goods-receiving space (16) in which at least one trough-like receiver (18) for the goods is located, and wherein the drawer-like insert (14) has at least one front opening (22) via which the goods-receiving space (16) and the trough-like receiver (18) are accessible, and wherein the insert has at least one transparent door (24) and at least one door guide (28) which, with respect to the assembled and erected state of the dispensing device (10), is arranged in the upper area of the opening (22), wherein the door (24) has at least two guide pins (30), and wherein the door guide (28) moreover has a first guide recess (32) and a second guide recess (34) in which the guide pins (30) are guided in such a way that the door (24) can be sunk at least partially into the goods-receiving space (16) by means of a combined tilting/turning movement followed by a pushing-in movement which extends substantially obliquely upwards with respect to the assembled and erected state of the dispensing device (10).
