Abstract (en)

[origin: WO2017042244A1] The invention relates to a tea filter insert (200, 250) for an automatic tea maker (100). The tea filter insert (200, 250) is designed to be completely introduced into a brewing chamber (124) of an automatic tea maker (100). The tea filter insert (200, 250) has a tea filter insert body (202, 254) which surrounds an interior (204, 258) for tea leaves (4), said interior being open towards the top of the tea filter insert (200, 250) and at least water-permeable towards the bottom of the tea filter insert (200, 250). A tea filter (206, 256) is attached or can be attached to the tea filter insert (200, 250) such that tea leaves (4) are prevented from exiting the tea filter insert (200, 250) through the bottom of the tea filter insert (200, 250). The invention further relates to a system (10) comprising an automatic tea maker (100), which is designed to brew tea beverages and which has a brewing chamber (124) that is open towards the top, and the tea filter insert (200, 250), wherein the external geometry of the tea filter insert is adapted to the internal geometry of the brewing chamber (124) of the automatic tea maker. The invention further relates to a method for operating a system (10).
