Abstract (en)  
[origin: WO2017042471A1] The present invention concerns a piece of furniture and/or household equipment, that is advantageously interactive, comprising: - at least one worktop formed from at least one substrate made from monolithic glass material having a surface area greater than 0.7 m<sup>2</sup>, said substrate having brightness L\* greater than 10, light transmission TL less than 60%, an opacity indicator greater than 30 and, if applicable, haze great than 15% - at least one light source, in particular intended to produce one or more areas or one or more elements or displays of the substrate, in particular by projection, said source being located, for example, perpendicular to the substrate, - at least one interface for communication with at least one element of the worktop such as the light source or sources, and/or if applicable with at least one external element for wireless communication, said equipment being further free of heating elements.
