Abstract (en)  
[origin: WO2017042472A1] The present invention concerns a piece of furniture and/or household equipment, that is advantageously interactive, comprising: - at least one worktop formed from at least one substrate made from monolithic transparent glass material having a surface area greater than 0.7 m<sup>2</sup>, provided with a coating such that the substrate provided with the coating has haze greater than 15%, light transmission TL less than 80%, and an opacity indicator greater than 50 - at least one light source, in particular intended to produce one or more areas or one or more elements or displays of the substrate, said source being located, in particular, perpendicular to the substrate for projection display, or under the substrate for display by transmission through the substrate, - at least one interface for communication with at least one element of the worktop such as the light source or sources, and/or if applicable with at least one external element for wireless communication, said equipment being further free of heating elements.
