Abstract (en)  
[origin: WO2017042478A1] The present invention concerns a piece of furniture and/or household equipment, that is advantageously interactive, comprising: - at least one worktop formed from at least one substrate made from monolithic transparent glass material having a surface area greater than 0.7 m<sup>2</sup>, said substrate being, in particular, mostly or entirely bare or provided with a coating or coatings such that the substrate coated in this way has haze less than 15% and/or light transmission TL greater than 60% and/or an opacity indicator less than 85 - at least one heating element, - at least one interface for communication with at least one element of the worktop such as the heating element or elements, and/or if applicable with at least one external element for wireless communication, - and optionally an element inserted into the substrate or worktop, in particular in such a way that the assembly formed by the substrate or worktop and the inserted element has haze greater than 15% and/or light transmission TL less than 60%, and/or an opacity indicator greater than 85, said equipment being further free of light sources.
