Abstract (en)

[origin: WO2017042391A1] The invention relates to a rear end (10) of a vehicle which comprises a body structure (12) defining an opening (14) which comprises a first side edge (16) and a second side edge. It comprises a tailgate (20) which is movable relative to the structure (12) between at least one open position, in which the opening (14) of the structure (12) is accessible, and a closed position, in which the tailgate (20) closes the opening (14) of the structure (12), the tailgate (20) comprising at least one first side edge (22) and one second side edge. It comprises an opening and closing device (26) securing the tailgate (20) to the structure (12). The opening and closing device (26) comprises at least one first actuator (28) and a second actuator (30), the first and second actuators (28, 30) each being secured between the structure (12) and the first side edge (22).
