Abstract (en)

[origin: US2018200916A1] A driving module for driving fasteners into a workpiece, the fasteners being interconnected via a connection mechanism to form a fastener belt and being magazined and rolled up to form a fastener belt roll, wherein the driving module has a driving apparatus, wherein the driving module has a mounting portion for mounting the driving apparatus on a workpiece bridge, wherein the driving apparatus has a driving drive, which acts on the respective fasteners to be driven with a driving force by way of a driving ram that is displaceable in the driving direction, and wherein a magazine having at least one exit portion is connectable to the driving apparatus; and by way of the exit portion, the fastener belt can be routed out of the magazine, and wherein the magazine has at least one fastening portion for fastening the magazine or parts thereof to the driving apparatus, wherein the magazine has at least two belt roll holders, each for receiving at least one fastener belt roll.
