Abstract (en)

[origin: EP3348739A1] A roof window (1) having a frame (2) and an elongate frame cover member (5) having two longitudinal edge portions (19) and two lateral edge portions (17). The elongate frame cover member (5) is adaptable to cover at least part of the exterior surface of a side member of the frame (2). The roof window (1) has an elongate frame cover member retaining arrangement with an arrangement (30) for slidably and releasably locating and retaining at least part of the elongate frame cover member (5) to the frame (2). The cover member retaining arrangement is disposed proximal the frame (2).
