Abstract (en)
A top cover assembly of an air conditioning device is provided. The top cover assembly (100) is provided at a top opening (22) in an upper end of an air conditioning device body (200), a cavity (113) is provided in a position of an upper end of the top cover assembly (100), and an air outlet (5) is provided between the top cover assembly (100) and the upper end of the body (200). The air conditioning device is further provided. By such a structure, formation of dews at an upper part of the top cover assembly is reduced.
