Abstract (en)

[origin: WO2017108391A1] The invention relates, inter alia, to a liquid-storage apparatus having a liquid tank (20). The invention makes provision for the liquid-storage apparatus to have a shared line (60) which is connected, at an interface (50), to an overflow line (40), which is connected to the liquid tank (20), and to an emptying line (70), which is connected to the liquid tank (20), and, in the case of a level of liquid which reaches, or exceeds, a predetermined maximum level of liquid in the liquid tank (20), the shared line (60) passes on liquid from the overflow line (40) to an end (61) of the shared line (60) which is remote from the interface (50) and, in the case of the liquid tank (20) being emptied, the shared line (60) passes on liquid from the emptying line (70) to the end (61) of the shared line (60) which is remote from the interface (50).
