Abstract (en)

[origin: WO2017048623A1] A container assembly includes a foldable container that includes a ventilated bottom panel, a pair of spaced apart ventilated side panels rotatably coupled to the ventilated bottom panel, and a pair of spaced apart ventilated end panels rotatably coupled to the ventilated bottom panel. The foldable container is configurable between a collapsed configuration and an open configuration. A pair of solid side panels is removably coupled to the pair of spaced apart ventilated side panels when the foldable container is in the open configuration, and a pair of solid end panels is removably coupled to the pair of spaced apart ventilated end panels when the foldable container is in the open configuration. Promotional indicia is on exterior surfaces of the solid side panels and the solid end panels.
