Abstract (en)
[origin: WO2017044998A1] The invention relates to an actuator (4) for moving a movably supported furniture part (3), comprising: at least one actuating arm (6) for moving the movable furniture part (3), which actuating arm is supported in such a way that the actuating arm can be moved between a closed position and an open position, a spring device (11), by means of which the actuating arm (6) can be retracted into the closed position within a closing range (31) directly in front of the closed position, wherein the actuator (4) has a coupling device (10), which decouples the spring device (11) from the actuating arm (6) in the closing range (31) when the actuating arm (6) is being opened and which couples the spring device (11) to the actuating arm (6) in the closing range (31) when the actuating arm (6) is being closed.
