Abstract (en)

[origin: WO2017046157A1] The invention relates to an automotive vehicle light-beam-projecting device comprising at least one light source (2) able to emit light rays, a projecting optical system with an exit pupil located on an exit optical element, the optical system being able to project a light beam, characterised in that it comprises a digital screen (4) configured to direct at least some of the incident light rays emitted by at least one source (2) toward said projecting optical system, the device (1) furthermore comprising means (5) for focusing the light rays emitted by the at least one light source (2) onto a zone (6) of the digital screen (4), and an intermediate assembly (9) for projecting the light rays coming from the digital screen (4) and configured to illuminate the area of the exit pupil.
