Abstract (en)

[origin: EP3351130A1] An adjustable divider arrangement for a luggage case (100) is provided. The luggage case (100) may include a plurality of walls defining an internal storage volume (102), the plurality of walls including opposing major faces (120) and a plurality of sidewalls (122); an internal divider (140) separating the internal storage volume (102) into a first storage volume (142) defined between the internal divider (140) and an opposing wall (144), the internal divider (140) movably mounted relative to the opposing wall (144); at least two straps (180) positioned near opposite ends or sides of the internal divider (140) and each connected to at least one of the walls of the luggage case (100) on or proximate to the opposing wall (144); and at least one buckle (190) mounted on the divider (140). Each buckle (190) may adjustably grip a corresponding strap (180) at different positions along the length of the strap (180) so as to secure the internal divider (140) to the strap (180) at different positions along the length of the strap (180) and thereby to position the internal divider (140) at different heights (H) from the opposing wall (144).
