Abstract (en)

[origin: CN108323905A] The present invention provides a hair ring (110) for stabilizing a braid, comprising an endless spiral body (112) composed of at least one body (114), the endless spiral body (112) is composed of a plurality of windings (117), and the body (114) is coated on the inner side (138) of the winding (117) with at least one strip (142) composed of at least one rubber coating (140). The present invention also provides a method (150) for manufacturing a hair ring (110) for stabilizing the braid. The method comprises the following steps: a) a step of forming at least one string-shaped moulded blank (154) from at least one base material; b) a step of applying at least one strip (140) consisting of at least one rubber coating (142) directly or indirectly to the moulded blank (154); c) a step of winding the shaped blank (154) into a spiral (166) having a plurality of turns (117), wherein the rubber coating (142) is disposed on the inner side (138) of the winding (117); d) a step of forming the spiral body (166) into an endless spiral (112).

Abstract (de)

Es wird Zopfhalter (110) zum Stabilisieren eines Haarzopfes und ein Verfahren (150) zur Herstellung eines Zopfhalters (110) zum Stabilisieren eines Haarzopfes vorgeschlagen. Der Zopfhalter (110) umfasst eine Endloshelix (112) mindestens eines Grundkörpers (114), insbesondere eine toroidale Helix (118), wobei die Endloshelix (112) aus einer Mehrzahl von Windungen (117) zusammengesetzt ist, wobei der Grundkörper (114) auf einer Innenseite (138) der Windungen (117) mit mindestens einem Streifen (140) mindestens einer Gummierung (142) beschichtet ist.
