Abstract (en)  
The invention relates to a door restrictor that can be installed quickly and conveniently by means of a step of pre-mounting and a step of mounting. The door restrictor comprises a device for attaching to a frame, a joining plate, and a device (1) for sliding attachment comprising a slide (9) with: a hole (15) for receiving a second joining element (5) linked to the joining plate (2), and a flange (25) around or partly inside the hole (15). The second joining element (5) comprises a peripheral groove (16) intended to receive the flange (25), for pre-mounting. The restrictor also comprises at least one locking lever (7) or locking plate (8) which, in the locking position, is in direct contact with the second joining element (5) or with the flange (25) of the slide (9), locking the position of the second joining element (5), securing the mounting.
