Abstract (en)

[origin: WO2017050782A1] The present invention relates to an assembly (1) for packaging and applying a liquid cosmetic product (P) comprising, on the one hand, a body forming a reservoir (3) which is intended to contain the cosmetic product (P) to be applied and, on the other hand, an applicator comprising an application member (5) that defines a convex application surface (50) having at least one apex (51); the body (2) which forms the reservoir comprising a housing capable of receiving the application member (5) and of which a dividing wall (8) with the reservoir has at least one through-orifice (9) in direct fluid communication with the reservoir, said orifices being located only at at least one end wall of the housing opposite the vicinity of an apex of the application member when said application member is in place in the housing of the body which forms a reservoir, **< b >**characterized in that**< /b >** the application member is produced from an open-cell porous material.
