Abstract (en)

[origin: WO2017051227A1] The present invention provides an applicator used in construction or repair work, which, during applying the sealing material, mastic or other elastic material to the joints or gaps of various surfaces, helps to smoothen or remove or collect said excess material. Said applicator comprises the attachment portion or base (2), attached to the sealing material tube, which is made up of the conical collar (11) that is attached to the nozzle of the tube of viscous material, and the support (12) which is a trough-shaped element or channel (13) into which a rotatable or raised part (3) is attached by way of an axle and in which there is linearly moveable footing (14) with a smoothening pad (15) attached to the sled.
