Abstract (en)

[origin: WO2017050391A1] The present disclosure provides an apparatus (100) configured for alignment of a screen device (110) with respect to a substrate (10) used in the manufacture of a solar cell. The apparatus includes a base device (120) and one or more rotatable devices configured for contacting the screen device (110), wherein at least one first rotatable device (130) of the one or more rotatable devices is connected to the base device (110) via one or more elastic elements (140).
