Abstract (en)

[origin: WO2017064020A1] The invention relates to a device and to a method for producing a security document (2), wherein a first document part and at least one further document part are provided, wherein the first and the at least one further document part are connected to one another by way of a joining method, wherein the first and the at least one further document part are folded, wherein an applied joining force forms at least part of the folding force which is required for folding in a folding/joining step.
