Abstract (en)
[origin: WO2017064021A1] The invention relates to a device and a method for producing a security document (1), wherein: the security document (1) is provided with at least one projecting layer (6); at least one image of at least one projecting section (7) of the projecting layer (6) is produced; a document-related spatial orientation of the projecting section (7) is determined in an image-based manner; a document-related spatial orientation of at least one non-imaged document feature of the security document (1) is determined according to the document-related spatial orientation of the projecting section (7), and a cutting trajectory (11) is determined according to the document-related spatial orientation of the non-imaged document feature of the security document (1) and/or a document-related spatial orientation of an imaged document feature of the projecting section (7) is determined in an image-based manner, and a cutting trajectory (11) is determined according to the document-related spatial orientation of the imaged document feature of the security document (1); and the security document (1) is cut along the cutting trajectory (11).
