Abstract (en)
[origin: WO2017102351A1] The present invention relates to a thermoplastic screen printing paste, comprising one or more hydroxy-functional polyesters, - one or more blocked polyisocyanates, - pigments, and - additives. The invention is characterized in that the melting or softening range of the thermoplastic screen printing paste is at temperatures below 90 °C and in that the paste is free from bisphenol-A and free from other substances which are directly involved in the polymerization.
