Abstract (en)
[origin: WO2017051110A1] The invention relates to a carbon paste supply device (100) for supplying a machine for transporting paste for forming moulded blocks, for producing electrodes, for electrolysis of aluminium, the device comprising: – at least one storage hopper (101); – at least one vibrating extractor (103); – at least one weighing hopper (104); – and a device (107) for controlling the flow rate of paste from the vibrating extractor (103).
