Abstract (en)

[origin: WO2017055781A1] The invention relates to an arrangement for mounting a lighting module (10A, 10B, 10C, 10D) in a motor vehicle shield (32) allowing lighting modules (10A, 10B, 10C, 10D) to be adapted to different models, the arrangement comprising a sleeve (40) intended to receive a front section (26) of the lighting module (10A, 10B, 10C, 10D), the sleeve (40) comprising a rear opening (46) for passage of the lighting module (10A, 10B, 10C, 10D) and comprising attachment means for attaching the lighting module (10A, 10B, 10C, 10D); characterised in that the peripheral rim of the opening (46) is capable of allowing the insertion of the front section (26) of each of the models of the lighting module (10A, 10B, 10C, 10D) having at least a minimum radial spacing (E1, E2, E3, E6, E7, E8, E9) with respect to the overall radial space requirement of the front section (26).
