Abstract (en)

[origin: WO2017054802A1] Disclosed is a securing device (1), comprising a front hood (2) and a hood lock (3) with a lock holder (10), for a motor vehicle; the hood lock (3) includes a rotary latch (4) featuring a pre-locking position and a main locking position, and an electric drive (5) for switching the rotary latch (4) from the main locking position into the pre-locking position, the front hood (2) being closed and locked in the main locking position; in the pre-locking position of the rotary latch, the front hood (2) can be manually moved from a locked position of the front hood (2) in which the lock holder (10) engages the rotary latch (4) and the front hood (2) is locked, into an unlocked position of the front hood (2) in which the lock holder (10) is released by the rotary latch (4) and the front hood (2) is unlocked.
