Abstract (en)

[origin: TW201712206A] A fitting for a sliding door (4) comprises a guide rail (3), along which at least one runner (6) is movable, on which a sliding door (4) is held, wherein at least one safety catch is provided on the runner (6) to avoid dropping out of the runner (6) from the guide rail (3), wherein the safety catch comprises a pushbutton (8, 8'), which is moved by the force of a force accumulator (10) into a securing position protruding in relation to the runner (6) and is movable into an engaged position against the force of the force accumulator (10) for dropping out. Furthermore, the invention relates to a method for mounting a sliding door (4) on a guide rail (3).
