Abstract (en)

[origin: CN108374233A] The invention relates to a method of producing control data of a warp knitting machine. In the method, the characters of a zone of a knitted fabric is limited, wherein the characters can be influenced on the basis of working mode of the warp knitting machine, so that at least one pattern, which can achieve the characters to a pre-determined degree, can be searched for every zone through a computer, and image data used for the pattern is provided and the pattern can be displayed; herein, the computer generates control data belonging to the corresponding zone by means of the pattern.
