Abstract (en)
[origin: EP3358095A1] A suspended ceiling comprises a set of ceiling tiles, a first set of profile rails, and a second set of profile rails. The profile rails in the first set of profile rails and the profile rails in the second set of profile rails are interlocked and extend substantially orthogonal to each other forming a frame system for the ceiling tiles in said set of ceiling tiles. Each ceiling tile is a substantially rectangular ceiling tile supported at opposite sides alone by the profile rails in said first set of profile rails.
