Abstract (en)

The application relates to a method for helping a user find the location of an electronic lock 10 which can be opened with the user's data carrier 40. The data carrier 40 can communicate with the electronic lock 10, and the electronic lock 10 can grant access to a physical space upon validation of access rights. The data carrier 40 is provided with access rights readable by the electronic lock 10 and with a digital image 50 of the electronic lock 10, e.g. of the complete front door 11 in which it is installed. The access rights and the digital image may be sent to the data carrier over the same communications channel. The access rights may be time restricted.
