Abstract (en)

[origin: WO2017060365A1] The invention relates to a washing item receptacle (12) for a flat washing item (17) in a dishwasher, in particular in a domestic dishwasher, comprising a base (14) and at least one support element (13) for supporting the flat washing item (17). The at least one support element (2) is designed to be pivoted between a rest position arranged on a plane of the base (14) and a support position which projects from the plane of the base (14). The at least one support element (13) can be pivoted from the rest position into the support position by the weight of the flat washing item (17).
