Abstract (en)
[origin: WO2017060445A1] The invention relates to a cover for a container (13) for receiving an enteral nutrition solution, comprising a thread that can be brought to engage with a counter winding on a container (13) for receiving an enteral nutrition solution, in order to cover an opening in said container (13) for receiving an enteral nutrition solution, and comprising a connection piece (15) for connecting a hose line (21). The invention is characterised in that, on an inner side of the cover (14), an opening device (1) is arranged having a first part (2) which is form-fittingly and/or force-fittingly connected to the cover (14), and a second part (3) which is permanently connected to said first part (2), wherein the second part (3) of the opening device (1) is secured, when in an initial opening device (1) state, to the first part (2) of the opening device (1) by means of a securing element (4) and can be moved, when in an opening state of the opening device (1), relative to the first part (2) of the opening device (1).
