Abstract (en)
[origin: WO2017060162A1] The invention relates to an automated primer application system (PA) for producing attachments for means of transportation, at least comprising an output reel (2), a receiver reel (3), an application head (8) with a nozzle opening (20), and a high-pressure-waterjet-bonded polymer cellulose nonwoven material (19), wherein said high-pressure-waterjet-bonded polymer cellulose nonwoven material (19) is guided from the output reel (2) to the receiver reel (3) via the application head (8), said high-pressure-waterjet-bonded polymer cellulose nonwoven material (19) is arranged in front of the nozzle opening (20), and a primer liquid (26) can be fed through the nozzle opening (20) such that the primer liquid (26) can be applied to a component surface by means of said polymer cellulose nonwoven material (19).
