Abstract (en)

[origin: WO2017060345A1] The invention relates to a gripping or clamping device (2) having an actuator (16), comprising a drive (27) driving the actuator, and at least one jaw (10, 12) that is motion-coupled with the actuator (16). The actuator comprises a spindle (18) having a threaded portion (20, 22), wherein for the purpose of motion coupling, an active portion (24, 26, 240) meshing the threaded portion (20, 22) is arranged on the jaw side.
