Abstract (en)
[origin: WO2017060811A1] The present invention relates to a device for the washing of textile articles which comprises at least one water-permeable bag comprising at least one portion consisting of a textile material supporting at least one color-catcher compound for catching coloring compounds dispersed in a washing bath, said textile material having a grammage within the range of 40-200 g/m² and an air permeability (UNI EN ISO 9237:1997) within the range of 1,000 - 3,500 mm/s. The present invention also relates to a method of use of the above device for the washing of textile articles.
