Abstract (en)
[origin: WO2017059911A1] The present invention relates to a laundry machine (1) such as washing-drying machine, comprising a front door with a mechanically improved front door locking mechanism. The present invention more particularly relates to a laundry machine (1) comprising a rotary drum in which the laundry is placed, an electric motor rotating the rotary drum and a front door (2) allowing access into the rotary drum for loading or unloading laundry through an access opening (4), the front door (2) being opened or closed around a door hinge (6) in the manner that a lock mechanism (13) comprising a handle (3) in mechanical connection with a locking arm retainer (9) releasably secured to a locking arm (7) by which the front door (2) is lockable or unlockable.
