Abstract (en)
[origin: WO2017060004A1] The invention relates to a mounting for securing a U-lock (11), which has a lock body (13) and a two-limbed bracket (15), to a two-wheeled vehicle, comprising a securing portion (21) for securing the mounting (19) to a frame of the two-wheeled vehicle and comprising a receiving portion (23) for receiving the U-lock (11). The invention is characterized in that the receiving portion (23) comprises a receiving sleeve (25) which has a lateral longitudinal through-passage (29), through which the lock body (13) of the U-lock (11) can be inserted into the receiving sleeve (25) so as to assume an intermediate position. The receiving sleeve (25) is equipped with at least one radially protruding channel-shaped bracket-receiving socket (37) in which a respective limb (17) of the bracket (15) of the U-lock (11) can be received in a lock body (13) end position which is axially offset relative to the intermediate position.
