Abstract (en)
[origin: WO2017059982A1] The invention relates to a flap holder for a furniture flap, which furniture flap can be moved between a closed position and an open position, comprising a lever, to which the furniture flap can be fastened, wherein the lever can be pivoted about a pivot axis, and comprising a tensioning lever, which is movably coupled to the lever by means of a coupling piece, wherein the tensioning lever is supported in a stationary manner. In the case of such a flap holder, reliable movement of the furniture flap can be realized in a simple manner, according to the invention, if an energy store is coupled to the tensioning lever indirectly or directly at the end facing away from the coupling piece.
