Abstract (en)

[origin: WO2017060135A1] The invention relates to a heater device having at least one open-loop and/or closed-loop control unit (12) for determining an air ratio (λ_c) of a combustion process. According to the invention, the open-loop and/or closed-loop control unit (12) is provided for determining the air ratio (λ_c) on the basis of an input power (P_{in}) and an ionization current (I) in at least one operating state.
