Abstract (en)
The invention provides a cash register station (1) for effecting payment for goods purchased in a commercial outlet, with a customer self-service function. The cash register station (1) for effecting payment for goods purchased in a commercial outlet, with a customer self-service function comprises a settlement/collection module (3), a cash register head (4), where at one side of the cash register station (1) there is a cashier space (6) and at the other side there is a customer space (7). The cash register head (4) of the settlement/collection module (3) comprises a cashier's registering module (8) and a customer's registering module (9), where the cashier's registering module (8) and the customer's registering module (9) are positioned at two opposite sides of the cash register head (4) and the cash register head (4) is arranged slideably so as to be positioned the farthest from the cashier space (8) when in cashier-attended function of the cash register station (1) and the closest to the cashier stand (8) when in the customer payment self-service function.
