Abstract (en)
[origin: WO2017066382A1] The present application provides an apparatus (102) for forming a tire bead. The apparatus may comprise a rotatable bead former (110) having a front portion (142) and a back portion (144). The rotatable bead former may comprise a first step (114) with a first diameter, the first step having at least a first bead-engaging surface circumnavigating an axis and configured to receive a first tire bead, and a second step (116) located closer to the back portion (144) than the first step, the second step having a second diameter different than the first diameter, and the second step having a second bead-engaging surface circumnavigating the axis and configured to receive a second tire bead.
