Abstract (en)

[origin: WO2017064409A1] The invention relates to a method for manufacturing a bag: a wall (1, 1a) of the bag is passed along a placement drum (30) for rotatably mounted handles (4); a handle (4) is hooked onto the drum (30), legs (41) of the handle (4) extending backwards along a perimeter of the drum (30) in the direction of rotation of the drum (30), the legs (41) being connected by a cross member (40); same is completely turned over using a turnover drum (37) so that the legs (41) are at the front on the placement drum; and the handle (4) is deposited on the wall.
