Abstract (en)

[origin: WO2017063938A1] The sheet according to the invention comprises: at least one main body portion (4) for forming a base (6), a cover (8), as well as a first lateral wall (10) and a second lateral wall (11) of the carrier bag (2); a first overlap portion (12) for forming an end-side side wall (14) of the carrier bag (2) and for forming a first fixing element (16) of a handle (28); and a second overlap portion (20) for forming a rear-side wall (22) of the carrier bag (2) and for forming a second fixing element (26) of the handle (28), wherein, in a first configuration, sections of the main body portion are superimposed in a planar manner at least by one part of the first overlap portion and/or by a part of the second overlap portion, wherein the main body portion (4), the first overlap portion (12) and the second overlap portion (20) each have folds (100-108; 200-212; 300-312), wherein the main body portion, the first overlap portion and the second overlap portion each bend along the respective folds as a result of a folding movement.
