Abstract (en)
[origin: WO2017063871A1] The invention relates to a pallet container, having a pallet bottom and having a folding wall ring, which can be moved between an erected functional position and a folded-together resting position, and having a pallet cover, which is held on the folding wall ring by at least one connecting means. The connecting means is designed as a flexible connecting strand, which is permanently connected to the pallet cover and the folding wall ring. In the region of the underside of the folding wall ring, the folding wall ring is held on the pallet bottom by means of at least one flexible holding band.
