Abstract (en)
Handling system (100) for mobile screen curtains (200) provided with a handle bar (203) having an internal guide (203a) and a movable carriage (206) comprising at least a first module (206a), the handling system (100) comprising a plurality of guiding elements (101) and at least one connector element (102) interposed between the guiding elements (101) and the at least one first module (206a). The guiding elements (101) form a head body being connected between them by means of at least one pair of pins (103) and at least an elastic element (104) interposed between the pins (103) and that the at least one connector element (102) is connected to the last guiding element (101) of the head body by means of at least a couple of other pins (103) and at least another resilient element (104) interposed between the other pins (103).
