Abstract (en)

The present invention relates to a user interface (14) including at least one touch slide element (16, 18), wherein the touch slide element (16, 18) is adapted for adjusting the power level distribution on the cooking area (12) and a corresponding cooking hob. The present invention also relates to a method for controlling a cooking hob (10) comprising at least one cooking area (12) with a plurality of separately adjustable heating elements, wherein the or a power level distribution on the cooking area (12) is adjusted by at least one touch slide element (16, 18).
