Abstract (en)  
[origin: EA036259B1] The invention relates to a cantilever device (10) for radiator (90) attachment to the wall (W), wherein the cantilever device (10) has a wall-mounting bracket (20) and a radiator holder (70) intended for attachment to the radiator or attached to the radiator, the wall-mounting bracket (20) has a wall contact surface (24) intended for contact with the wall (W) and anchor attachment component (25), in particular a bore for the anchor (27) and/or anchor (27), the anchor (27) is capable of and is intended for wall-mounting bracket (20) anchorage on the wall, the wall-mounting bracket (20) has a hook groove (30, 31), and the radiator holder (70) has a hook-shaped lug (77) for engagement with the groove (30, 31) for the wall-mounting bracket (20) hook, the hook-shaped lug (77) and hook groove (30, 31) are placed along the axis (S) of the insert along which the hook-shaped lug (77) can be inserted into the hook groove (30, 31), the wall-mounting bracket (20) has a clamping unit (50) for hook-shaped lug (77) clamping in the hook groove (30, 31). The clamping unit (50) intended for hook-shaped lug clamping in the hook groove (30, 31) with clamping direction (KR) transversely to the insert axis (S) is supported by the wall-mounting bracket (20).
