Abstract (en)

[origin: WO2017068109A1] The invention relates to a time-efficient, cost-effective, reliable and material-saving device (1) for cutting off and providing a film part unit (20) from a food packaging film strip (7), comprising a cutting station (2) configured to intermittently cut off film part units (20) from a film strip (7) intermittently passing through the cutting station (2) in a conveying direction (5), characterised in that the cutting station (2) is configured to pre-cut a film part unit (20) in a working step, wherein the film part unit (20) remains connected to the film strip (7), and to cut off a film part unit (20) from the film strip (7) that is adjacent in the conveying direction (5) and already pre-cut in a previous working step. The invention also relates to a corresponding method.
