Abstract (en)
[origin: WO2017067885A1] The invention relates to a fermentation tank and to a method, said tank comprising a first supply or discharge line with a first central opening (6a) arranged on the lower end of the fermentation tank for supplying or discharging a product. Said fermentation tank also comprises a second and third supply and discharge line with respectively a centrally arranged opening for supplying or discharging a product, the three openings being arranged at different height levels.
