Abstract (en)
[origin: EP3366303A1] The invention relates to a cell therapy product comprising mammalian therapeutic cells, preferably mesenchymal stem cell (MSCs) or T cells, for use as a medicament in the treatment of a medical condition, preferably for the treatment of a tumor and/or malignant disease or a disease associated with inflammation, wherein said treatment comprises administration of an endothelial damaging agent to the subject prior to or in combination with the cell therapy product.
